# ~THE MAYAN TZOLKIN CALENDAR ~

The 'Sacred round' of the Mayan calendar is named the Tzolk'in, meaning 'count of days' in the Yucatec language. This calendar is composed of 20 oracles and 13 tones (the trecena). The Tzolk'in is far more than a calendar, it is a galactic code to the workings of the universe. Within this sacred code, each oracle and its representative glyph can be considered a different aspect or face of the Creator. Each of the possible combinations of oracle and tone offers a particular expression of these faces. By working with these, both singly and in combination you can vastly enhance your personal and spiritual growth. This calendar has been created to allow you to connect with the oracles, and by so doing, remember that you are the real oracle. You are the Knower.

All this or any other oracle can do is to create a clear connection to the deep well of subconscious knowledge that is already within you. The Mayan glyphs are a collection of ancient symbols imbued with deeply symbolic messages, which constitute what may be considered a galactic "language of light". The oracles activate and promote the cellular reconstruction required to nourish your "light body", the spirit body that is crafted within you, and permeates your physical form. As your light body is activated, more of your decisions are made in alignment with Spirit.

# Who were the Maya

The Maya were an ancient civilisation that lived in central america whose empire spanned across the modern day states of Guatemala, Belize, western Honduras and El Salvador, as well as the southern Mexican states of Chiapas, Tabasco, and the Yucatán Peninsula. We now only have access to the remnants of their sacred texts (or codices), murals and stone inscriptions in their monuments and temples. Despite their meteoric rise and fall, their culture is now renowned for its incredible scientific and artistic feats, from architecture to mathematics, astronomy to literature.

A traditional tale tells of the original Maya that came from the sky, over the land, across the seas and from within the bowels of the earth. Correlations have been made between the Maya and many other civilisations – the Egyptians, Atlantians and Lemurians, as well as other ancient peoples of Africa, Europe and Asia. No other people had a writing system as advanced and mature at the time the Maya culture was at its peak. Despite the great effect upon their empire, the permanent relics they left that still stand, and their huge influence on the entire Mesoamerican people, so little is known of their great civilisation.

What you are holding is a modern interpretation of their divinatory systems, compiled from many different bodies of research and generations of analysis. Through your personal relationship with their timeless wisdom, all that is not written here may be revealed through your own inner journey.

## The wisdom of Shadow

The shadow part of self is often viewed by the ego as "bad", when actually it is a very potent and a creative force. The disowned or unconscious parts of ourselves are truly the keepers of great wisdom. Shadow is simply the face of the light that is unseen. Through working with it, you are provided with the opportunity to heal yourself and live a fully integrated life. Free yourself from the viewpoints of difficulty, drama and struggle. As you integrate your shadow issues and become more 'transparent', the projections of others begin to literally pass through you without creating charged reactions or emotional hurts. In transforming ourselves, we help transform others and the Earth.

## The Story of the Oracles

Imix the red Dragon is the standing mother, open to all possibilities. She is the still and tranquil waters. The wind, Ik, the Spirit breath, moves the water, bringing inspiration. It is time to go within with Akbal in dream time, going into the deep abyss of the womb to garner the gifts awaiting there. The ground is now fertile, by Kan the child is born, the time to scatter your seeds. There is now life, and the need for survival and vitality. Chic-Chan, Kundalini; energy of creativity. Cimi teaches us to surrender to life. Humility brings us our revelations, death and rebirth. Manik is the gateway, the lessons we need to learn as children. You are in the tunnel. To reach the realisation of the new reality, Lamat is the opening after the gateway. Muluc reminds us of our emotions, holds and protects us, leaving us safe to feel freely. Our friends and our companions of destiny are here to guide us in Oc, the dog; loyalty. The monkey reminds us of playfulness, Chuen, no stress, just laugh and dance. The harvest time is here, where we reap what has been sown with Eb. We as adults turn the soil to recreate. The chalice must be empty to be refilled with the abundance of plenty. We are ready to go beyond the physical into the spiritual realms of timelessness, Ben, the skywalker. Ix the magician reminds us of the magic of life and our wizard within. Men the eagle sours above all, detached and at ease - we can see all perspectives. The warrior Cib is the cosmic diplomat, allowing communication with the higher self & beyond. Caban the earth keeper heals and sanctifies the earth, walking through the hills. Coming into the chaos with the sword of truth that cuts through the mirrors of illusion, Etznab. Cauac brings us through the storm, shedding off all that binds, cleansing and purifying. Bringing us to ascension, Ahau, Unconditional Love, the Solar Lord, ultimate state of being. The cycle rotates, we are open to all possibilities again

Long count and Dreamspell

The **Long count** is true to the origins of the Sacred Mayan culture. Including the leap year and keeping true track of time. You can find more info and your birth kin on http://www.mayanmajix.com/ and watching Ian Xel Lungolds DVD is highly recommended to get a good overview. Sojournal 2009 will bring more insight to this count.

The **Dreamspell** calendar is based upon the ancient Mayan reckoning of time. Dr. Jose Arguelles reinterpreted the Mayan cycles in a modern context and named it the Dreamspell calendar. The leap year is not included in this count, so as not to disturb the cycles with which Jose worked with, making this count out of sink with the Long count. His teachings are valid, as it still follows the patterns and teachings of the Maya. http://members.shaw.ca/mjfinley/arguelles.html will give you more insight. And http://www.tortuga.com/ is a colourful guide through all the aspects of the Dreamspell.

Look up your Mayan Kin on the following table and write it down. Then you can mark you galactic birthdays on the calendar and celebrate them. Find your friends and relatives too, this can be fun.

The 20 Seals and 13 galactic tones can be found within you and the world around you. Each Oracle corresponds to your fingers and toes. The 13 galactic tones correspond to the 13 main joins in your body.

#### INSTRUCTIONS

- 1. Find the code (bold) of the corresponding gregorian year in the Table A.
- 2. Find the corresponding gregorian day in Table B.
- 3. Add both A and B codes. The resultant number will be the kin number (day number) in the tzolkin Calendar. If this number is more than 260, you must subtract 260 to obtain the kin number.
- 4. Look for the kin number in Table C to the right (table of Codes of the Sacred Calendar Tzolkin). There you will find facts, like your galactic signature; your seal, the corresponding tone, your guiding power, earth family, etc.

mordial depths.

The Mayan name, Imix, is a word that the authors believe refers to the earth god and consequently to Earth itself. The Mayan glyph for the day has been compared to a woman's nipple, a symbol of nourishment. Imix also has connections with the ceiba tree, a giant tree usually found growing in the old town plazas, that symbolizes growth from deep within the earth (from its core, to be exact).

Personal: These people have strong creative urges and feel an instinctive need to nurture others. For many, this need is actually the reflection of a desire to have a family to protect, although this need can also be met through pets and friends.

Challenge: To accept themselves completely and to become free from feelings of rejection by parents or other authority figures; to join with others on terms that are shared by the others; to refrain from being judgemental.

**Solution:** Founding a business or creating a home. Learning to be independent.

**The Discoverer** The unbridled bird knows freedom by soaring on the updraft

The Mayan name Ik means wind, breath, and life, suggesting a concept like "the breath of life." The glyph for this day-sign, which usually included a "T" design, had associations with a god of rains as well as wind. Rains are needed to germinate seeds and stimulate life, and this "coming to life" may be the meaning the Maya intended.

*Personal:* There is a strong need to communicate. For some, this urge or interest may lead to a life of teaching or performing. **Personal:** Akbal types are often powerful and tend to project an imposing or attractive presence on the world around them. There is a deep need for very secure foundations. These security needs may be intellectual, as in science or religion, or they may be material, as in possession of valuables. Kan suggests corn and ripeness. The glyph symbolises a seed going in the fertile ground. Young maize plants are shown growing from the Kan glyph in the codices. This glyph, often painted yellow, is also found in the codices near offerings of food, which suggests that corn, the most important food of the Maya, was simply a reference to that which sustains life.

**Personal:** Kan types are ready for life in the social world and are often in leadership and performance. Beneath the surface they have a strong need for recognition. The reactive self is creatively alive and seeks outlets for this energy. Kan people are often leaders at an early age. Others admire them for their confidence and willingness to take a stand.

**Personal:** Chic chan is a strong-willed, powerful, and charismatic day-sign. Beneath the surface they struggle with powerful inner conflicts. This internal wrestling often leads the person to take committed positions on issues. Others may find them a bit fanatical at times, or at least somewhat extreme. **Personal:** Cimi types tend to be security conscious, materialistic, sacrificing, accepting of change and helpful. They are not often confident leaders and will more often comfortably accept a secondary role or position. Beneath the surface is a person with a strong commitment to the community. Cimi people will sacrifice time for others, though they are often not sure just why it is that they do so. They have an extremely strong sense of tradition and are attracted to history and antiques. The Mayan word Lamat referred to the planet Venus, the "great star." Drunkenness is suggested by this symbolism also, because the Mayan concept of Venus included the notion of inebriation.

Personal: Lamat is energetic, busy, nervous, quick and playful. Those born under it are moving constantly and are always busy with something. They secretly love a confrontation and will take risks in life in order to create conflict. Sojourner, come to the threshold of this new dawning!

Ahau means lord or chief. The glyph for the day is sometimes a four-petaled flower though it also appears as a face. To the Maya, the flower was a symbol of the lord or sun, and this was its day.

**Personal:** Ahau types are loving, devoted, artistic, dreamy and romantic. They can be loyal friends and lovers, but often suffer in relationships because of unrealistic expectations. They can be attracted to a glamorous lifestyle. Such a person may find success in a life in fashion or as a performer or public personality.
